

## Questions for Building an Anaerobic Digestion System

1. **Feedstock:** do you have sufficient feedstock for your anaerobic digestion system?

Yes

No

2. **Cost:** Are you willing to spend \$1 - \$4 million on your anaerobic digestion project?

Yes

No

3. **Time:** Do you have enough time to invest in building and running your anaerobic digestion system?

Yes

No

4. **Grid interconnection:** Are you close enough to the BC Hydro or Terasen gas grid to sell your energy?

Yes

No

5. **Space:** Do you have enough space to build your anaerobic digestion system?

Yes

No

6. **Storage and land:** Do you have enough manure storage to store, and land to land apply the digestate from your anaerobic digestion system?

Yes

No

7. **Farm set-up:** Is your farm well set-up for your anaerobic digestion system?

Yes

No

8. **Co-products:** do you have use for excess heat or nutrients from your anaerobic digestion system?

Yes

No

9. **Operational changes:** do you anticipate any changes to your current operations? (e.g., herd expansion, new barn, production change, etc.)

Yes

No

10. **Off-farm feedstock:** are you prepared to use off-farm feedstock in your anaerobic digestion system?

Yes

No
